Eyebrow heading: The Retail Problem

Title: Retailers Operate Completely Blind

Without a reliable people counting system, every staffing decision, store layout change, and marketing campaign is a costly guess.

1) Inaccurate foot traffic measurement

Manual counts miss thousands of daily visitors, making data unreliable

2) Traffic not linked to transactions

No visibility into conversion rates or revenue lost to missed opportunities

3) Unknown customer demographics

Marketing targets the wrong audience — spend is wasted on poor segments

4) Slow, manual reporting cycles

Decisions are made days after the data is relevant, costing sales

KEY FEATURES (HIGHLIGHT BLOCKS)

Eyebrow heading: People Counting Solutions

Title: One Platform. Many Insights.

AI-powered footfall analytics embedded with deep learning and 3D stereo vision — the most complete retail traffic counter available.

Real-Time Footfall Counter

Track today, yesterday, weekly and monthly footfall with live updates. Your always-on retail traffic counter.

Multi-Location Footfall

Filter and compare in-store analytics across all your locations from one unified people counting dashboard.

Pass-By Traffic Counter

Measure how many people walk past vs. enter — essential data for window display and signage optimization.

POS Integration

Sync your Point of Sale with the footfall counter to measure conversion rates and peak selling hours automatically.

Conversion Rate Analytics

Auto-calculate the % of visitors who become paying customers. Core to any customer journey analytics software.

Hourly Distribution

See footfall broken by hour to optimize staffing and identify peak periods with your retail traffic counter data.

Demographics & Segmentation

Go beyond counts — gender, age group, and group-visit segmentation for sharper in-store analytics insights.

Staff vs. Customer Filter

AI distinguishes staff movements from customers so your people counting system data is always clean.

Automated Report Scheduling

Daily, weekly, or monthly email reports to stakeholders — zero manual work. True set-it-and-forget-it analytics.

EB Title: In-Store Analytics

Title: See Every Customer. Know Your Store.

Your people counting solutions platform tracks every visitor in real time — from entrance to checkout — giving you a complete customer journey analytics picture.

1. 3D Stereo Vision Detection

The footfall camera uses dual lenses to detect and count every person accurately, filtering out carts, shadows, and mannequins.

2. Real-Time Footfall Counter

Watch your people counter update live as visitors enter and exit — no delays, no gaps.

3. Customer Journey Analytics

Understand where customers go, how long they stay, and what drives conversion in your retail traffic analysis.

4. Multi-Unit Path Linking

AI coordinates multiple sensors to cover wide entrances with zero double-counting — perfect people counting solutions for large stores.

EB title: Dashboard Views

Title: Footfall Analytics Your Way

Multiple views, one platform — from your live people counter to historical retail traffic counter reports.

(include dashboard views)

Section Title: Powerful Features Built for Modern Retail Intelligence

Beyond Traffic combines advanced AI, real-time data processing, and intuitive dashboards to deliver a complete retail analytics platform. Every feature is designed to help you understand customer behavior, improve conversions, and optimize store performance across locations.

1. Real-Time Footfall Analytics

Track every visitor entering and exiting your store with live data updates. Identify peak hours, daily trends, and seasonal patterns to make smarter operational decisions.

Key Benefits:

- Real-time people counting
- Entry and exit tracking
- Hourly, daily, monthly insights

2. Conversion & Sales Insights

Understand how your traffic translates into revenue. By integrating with your POS system, Beyond Traffic helps you measure true store performance.

Key Benefits:

- Conversion rate (visitors vs buyers)
- Revenue per visitor
- Peak selling hour identification

3. Customer Behavior & Demographics

Go beyond numbers and understand who your customers are and how they interact with your store.

Key Benefits:

- Gender-based insights
- Adults vs children tracking
- Group vs individual visits
- Staff vs customer differentiation

4. Multi-Store Performance Analytics

Manage all your locations from a single dashboard and compare performance across regions.

Key Benefits:

- Store-to-store comparison
- Performance benchmarking
- Centralized data visibility

5. Occupancy & In-Store Intelligence

Gain visibility into how customers move within your store and how space is utilized.

Key Benefits:

- Real-time occupancy monitoring
- Zone-level insights
- Dwell time tracking

6. AI-Driven Insights & Forecasting

Turn data into decisions with built-in intelligence that highlights trends and predicts future performance.

Key Benefits:

- Predictive traffic trends

- Automated recommendations
- Anomaly detection

7. Smart Reporting & Dashboards

Access clear, visual insights without manual effort.

Key Benefits:

- Custom dashboards
- Automated reports (daily/weekly/monthly)
- Multi-user access with role-based control

Section: High Accuracy Sensors That Power Every Insight

Accurate data starts at the source. Beyond Traffic's advanced people counting sensors use 3D stereo vision and AI technology to capture precise, real-world customer movement—ensuring every insight you see is reliable and actionable.

3D AI-Powered Counting Technology

Our sensors use dual-lens stereo vision to create depth-based detection, ensuring accurate counting even in crowded or complex retail environments.

Industry-Leading Accuracy

Achieve up to 98%+ accuracy with intelligent filtering that eliminates false counts caused by shadows, reflections, carts, and other non-human objects

True Customer Detection

Go beyond basic counting with smart identification capabilities:

- Distinguish staff from customers
- Detect adults vs children
- Identify group visits

Seamless Coverage for Any Space

Designed to handle real-world retail challenges:

- Wide entrance coverage
- Multi-sensor linking for large areas
- No double counting in overlapping zones

Flexible Installation & Connectivity

Easy deployment across different store formats:

- Supports multiple mounting heights
- Surface-mounted design
- Wi-Fi and BLE connectivity

Real-Time Device Monitoring

Stay in control with proactive system management:

- Device health alerts
- Maintenance notifications
- Remote diagnostics

SECTION FAQ- BEYOND TRAFFIC

1)What is a people counting system?

A people counting system is a technology solution that tracks the number of visitors entering and exiting a store or location. Beyond Traffic uses AI-powered sensors and footfall analytics software to provide real-time visitor insights, helping businesses in the UAE make data-driven decisions.

2)How does footfall analytics help retail businesses in the UAE?

Footfall analytics helps UAE retailers understand:

- How many customers visit their store?
- When peak hours occur
- How many visitors convert into buyers?

This allows businesses to optimize staffing, improve store layouts, and increase sales performance.

3)Is Beyond Traffic suitable for malls and large retail chains in Dubai?

Yes. Beyond Traffic is designed for:

- Multi-store retail chains
- Shopping malls
- Large commercial spaces

It provides centralized dashboards to compare performance across multiple locations in Dubai and across the UAE.

4)How accurate is the Beyond Traffic people counting system?

Beyond Traffic uses advanced 3D stereo vision sensors with AI filtering technology, delivering up to 98%+ accuracy under typical retail conditions. It eliminates false counts caused by shadows, reflections, and non-human objects.

5)Can the system differentiate between staff and customers?

Yes. Beyond Traffic can distinguish staff from customers, ensuring accurate footfall data and more reliable conversion rate analysis.

6)Does the system track customer demographics?

Yes. The platform provides basic demographic insights such as:

- Gender (male/female)
- Adults vs children
- Group vs individual visitors

This helps UAE retailers tailor marketing and in-store experiences.

7)Can Beyond Traffic measure conversion rates?

Yes. By integrating with your POS system, Beyond Traffic compares footfall data with transactions to calculate conversion rates and identify opportunities to improve sales.

8)What kind of reports does the system provide?

Beyond Traffic offers:

- Real-time dashboards
- Daily, weekly, and monthly reports
- Automated email reports
- Customizable analytics views

Reports can be accessed anytime from cloud-based dashboards.

9) Can I monitor multiple stores from one dashboard?

Yes. Beyond Traffic provides multi-store analytics, allowing you to monitor performance across all your UAE locations from a single platform.

10) How much does a people counting system cost in the UAE?

The cost depends on:

- Number of stores
- Number of entrances
- Required features and integrations

Built for Modern Retail Environments

- Retail Stores
- Shopping Malls
- Restaurants
- Commercial Buildings

Call to action : Book a demo

Section 2 : Please add all industries as separate sections so that we could point it with a url.

Fashion & Apparel Retail

From high-street fashion to independent boutiques — fashion retailers in the UAE need to know exactly who's walking through the door, when, and how often they convert to buyers.

Challenge

High rent = high pressure to convert

Solution

Conversion rate + hourly staffing data

- Know which displays attract the most dwell time
- Compare conversion rates across mall locations
- Staff peak hours based on real footfall data
- Measure impact of promotions on actual traffic
- Understand gender split to optimise stock mix

Focus points: Conversion Tracking Demographics Multi-Location

Shopping Malls & Retail Centres

UAE shopping malls are among the busiest in the world. Mall operators and management companies need accurate zone-by-zone footfall data to serve tenants, prove ROI on events and manage operations at scale.

- Entrance-by-entrance traffic counts across the mall
- Zone-level footfall for tenant benchmarking
- Occupancy counter for safety & compliance
- Peak hour planning for cleaning, security, and concierge
- Event impact measurement (how much did DSF sale drive footfall?)
- Automated reports for management and tenant reporting

Focus points: Zone Analytics Occupancy Counter Tenant Reports

Jewellery & Luxury Retail

Jewellery retail in the UAE is high-value and high-service. Every visitor who walks in is a serious potential customer. Know your true window-to-visit rate, staff accordingly, and track if your window displays are pulling people in from the mall corridor.

- Pass-by to entry conversion rate (window appeal metric)
- Sales conversion from footfall vs. appointments
- Gender demographics for targeted marketing

- Staff-to-customer ratio optimization
- Cross-location data for multi-store chains

Hospitality & F&B

Hotels, restaurants, cafes and food courts in the UAE can use footfall analytics to manage queue times, optimise seating, track peak periods and measure campaign effectiveness in driving walk-ins.

- Live occupancy counter for seating management
- Peak traffic hours for kitchen and staff scheduling
- Queue monitoring at reception, buffet, or entry
- Group visit identification for reservations planning
- Multi-outlet comparison for F&B chains

Focus points: Occupancy Counter Queue Analytics
